Career Objective

MCA graduate with a strong foundation in programming, web development, database management, and software development. Hands-on experience building web applications and working with Python-based machine learning projects. Seeking opportunities to contribute to web development and application development projects, with a keen interest in developing scalable, user-friendly solutions and learning emerging technologies.

Education

Master of Computer Applications (MCA) 2023 – 2025
Vivekananda College of Engineering and Technology, Puttur CGPA - 8.68

Bachelor of Computer Applications (BCA) 2020 – 2023
Vivekananda College of Engineering and Technology, Puttur CGPA - 6.83

Technical Skills

- **Programming Languages:** Python, PHP, JavaScript, SQL
- **Web Technologies:** HTML5, CSS3, JavaScript, jQuery, PHP
- **Frameworks:** Angular, MVC Architecture
- **Database Management:** MySQL, SQL, CRUD Operations
- **Core Concepts:** OOP, DBMS, Data Structures, REST API Fundamentals
- **Tools:** Git, GitHub, VS Code, XAMPP

Industry Exposure

AI & Machine Learning Intern November 2024 – January 2025
Zephyr Technologies and Solutions Pvt. Ltd., Mangalore

- Used Python for data preprocessing, analysis, and machine learning applications.
- Performed data cleaning, feature engineering, and model evaluation.
- Collaborated with team members to improve data processing and machine learning workflows.

Academic Projects

Smart Safety Surveillance System for PPE Compliance Monitoring

- Developed a real-time workplace PPE monitoring system using Python, YOLO, ESP32-CAM, and Arduino with automated safety alerts.
- Selected as the KSCST Main Project and presented at the State-Level Project Demonstration.

Food Waste Management System

- Developed a web-based food redistribution platform using PHP, MySQL, HTML5, CSS3, and JavaScript, connecting donors with NGOs and beneficiaries.
- Implemented database design, PHP-based CRUD operations, and responsive user interfaces.

Bus Ticket Booking System

- Developed a PHP and MySQL-based web application using HTML5, CSS3, and JavaScript for bus search, ticket booking, and user management.

CGPA Calculator and Performance Analytics

- Developed an interactive CGPA calculator using Angular, JavaScript, jQuery, HTML5, and CSS3 for grade calculation and student performance tracking.

Certifications & Achievements

- Selected Main Project for KSCST – Smart Safety Surveillance System for Real-Time PPE Compliance Monitoring
- Presented an IoT-based safety monitoring research paper at DRISHTI-2025, in association with IEEE, VCET.
- ISRO Quiz – First Place, VCET
- IIRS-ISRO Outreach Programme
- CODE-A-THON – First Place, VCET
- MOOC Course on Privacy, Security and Social Media – VTU
